Program Overview

Students can study on this CCIS program in Shanghai, the financial and commercial capital of China, at Shanghai University (SHU) in a summer session, and/or for a fall or spring semester. Shanghai University is a municipal university serving about forty thousand Chinese students, with three thousand international students studying at SHU each year, who explore and learn Chinese language, culture and business in this dynamic city.

Semester students take a Mandarin language course at their level and elect from courses taught in Enuding Culture in Contemporary China, Asian Economics, E-Commerce, Marketing Strategy, Finance, Communication Skills, Tourism Management, Event Management, and Chinese Business and Enterprises. No knowledge of Chinese language is required. Students enjoy a rich out-of-class field trip program with many excursions to businesses and places of cultural and economic importance in Shanghai, a city of twenty million, in addition to out-of-town field trips to scenic and historic locations such as Suzhou and Hangzhou.

What You Will Gain

China's rapid growth and its integration into the world economy has created opportunities for international businesses but it has also challenged businesses to adjust their way of doing business in China. To thrive in China, businesses must understand the changing and complex market environment, China's national and local policies, in addition to Chinese language and culture.

This program is designed to provide students with a multi-dimensional understanding of doing business in China. This well-tailored, multi-disciplinary program focuses on all specific areas relevant to doing business in China. The program aims to equip students with systematic knowledge of business practices, with a background of both the theories and up-to-date practical applications that are in use, and the ability to analyze changes in government policies and regulations that effect business operations in China.
